WaveNet: A Generative Model for Raw Audio

This post presents <u>WaveNet</u>, a deep generative model of raw audio waveforms. We show that WaveNets are able to generate speech which mimics any human voice and which sounds more natural than the best existing Text-to-Speech systems, reducing the gap with human performance by over 50%.

We also demonstrate that the same network can be used to synthesize other audio signals such as music, and present some striking samples of automatically generated piano pieces.

Voice Kit Assembly Guide

- GET THE VOICE KIT SD IMAGE
- ASSEMBLE THE HARDWARE
- FOLD THE CARDBOARD
- PUT IT ALL TOGETHER
- CONNECT AND BOOT THE DEVICE
- VERIFY IT WORKS

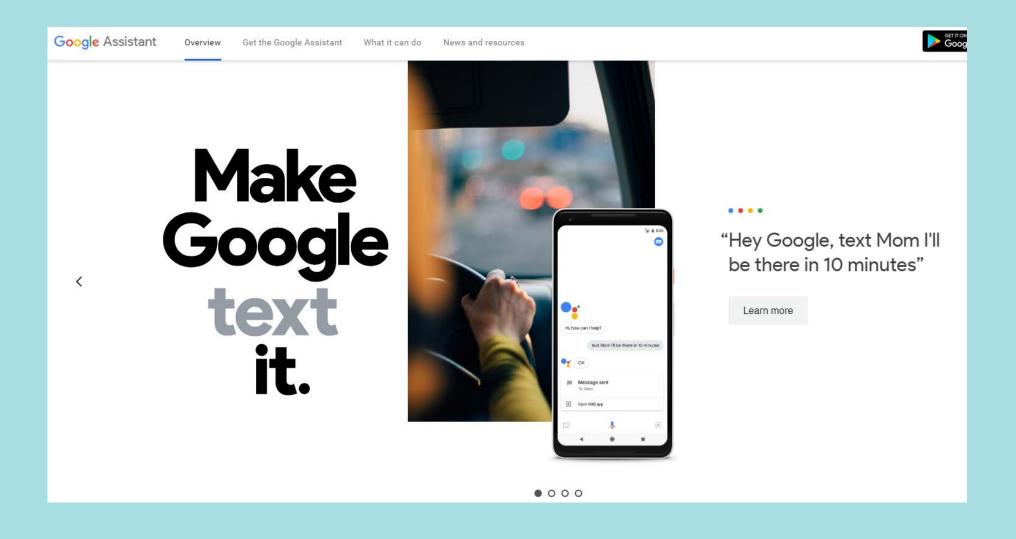

Voice Kit User's Guide

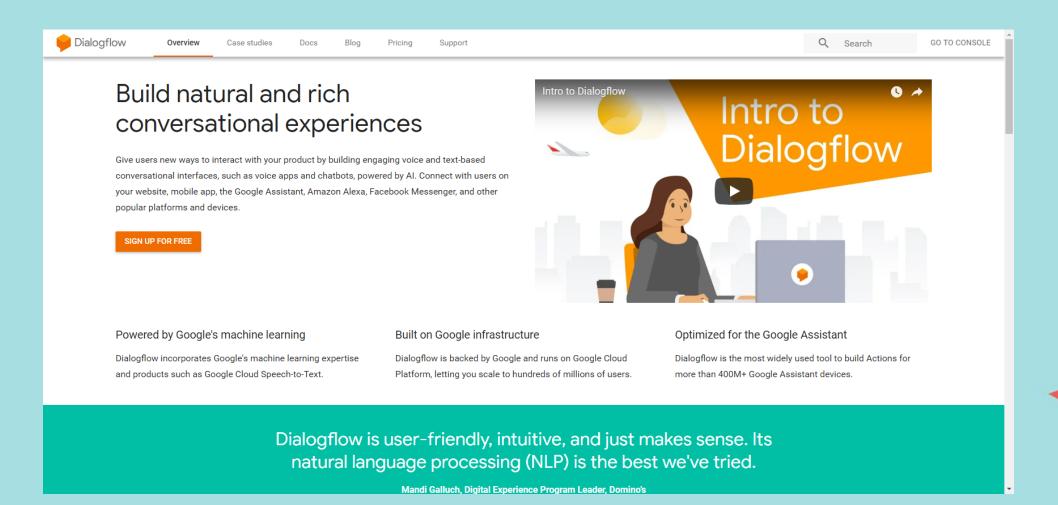

- SETTING UP YOUR DEVICE
- TURN ON THE GOOGLE ASSISTANT API
- USING YOUR DEVICE

Google Assistant

Dialogflow

Thanks! Q&A
